Target Title

Senior DevOps Engineer | DevOps Engineer | Cloud Engineer | SRE | Platform Engineer | Infrastructure Engineer

Technical Keywords

AWS, Kubernetes, EKS, Docker, Terraform, Terraform Cloud, CloudFormation, CI/CD, Jenkins, GitHub Actions, GitLab CI, Linux, Bash, Python, Monitoring, Observability, Prometheus, Grafana, ELK, Datadog, GitOps, ArgoCD, FluxCD, SRE, SLIs, SLOs, Error Budgets, Chaos Engineering, Karpenter, Autoscaling, Service Mesh, Istio, Linkerd, Cloud Security, Prisma Cloud, Trivy, Checkov, OPA, Zero Trust, RBAC, mTLS, Compliance, PCI-DSS, ISO 27001, FinOps, Cost Optimization, Cloud Governance, VPC, Networking, Load Balancing, Firewalls, High Availability

Professional Summary

Senior DevOps/Cloud Engineer with 6+ years of experience building, automating, and securing cloud-native platforms. Expert in AWS, Kubernetes (EKS), IaC, CI/CD, observability, and SRE practices. Proven success achieving 99.95% uptime, reducing provisioning time from hours to minutes, cutting critical vulnerabilities by 75%, improving MTTR by 35%, and lowering RTO from 4 hours to 15 minutes. Strong background in GitOps, cost optimization, compliance automation, cloud governance, and multi-region production architectures.

Tools & Platforms

AWS, Terraform, Kubernetes, Jenkins, GitHub, GitLab, Ansible, Helm, CDK, Prisma Cloud, Trivy, Checkov, Prometheus, Grafana, ELK, Datadog, Jira, BurpSuite, SQLMap

Core Skills

Cloud: AWS (EC2, S3, RDS, Lambda, IAM, VPC, CloudWatch, EKS), Azure Fundamentals

IaC: Terraform, Terraform Cloud, CloudFormation, GitOps, Helm, CDK, Ansible

CI/CD: Jenkins, GitHub Actions, GitLab CI, Declarative Pipelines

Containers: Docker, Kubernetes, Pod Security, Operators, Karpenter

Security: Prisma Cloud, Trivy, Checkov, OPA, Zero Trust, mTLS, RBAC

Observability: Prometheus, Grafana, ELK, Datadog, Alerting

SRE: SLIs, SLOs, Error Budgets, Incident Response, Toil Reduction

Networking: DNS, TCP/IP, Load Balancers, Firewalls, QoS

Languages: Bash, Python

Professional Experience

Axis Bank

Senior DevOps Engineer

Mumbai, India

Oct 2024 – Present

- Automated AWS infrastructure for 50+ microservices achieving 99.95% uptime using multi-AZ and autoscaling patterns.
- Built GitOps pipelines (Terraform + Jenkins) reducing provisioning from 2 hours to 15 minutes; enforced governance using OPA and Checkov.
- Strengthened container security with Prisma Cloud reducing critical CVEs by 75%.
- Implemented observability stack (Prometheus, Grafana, CloudWatch) improving MTTR by 35%; defined SLIs/SLOs.
- Automated patching for 500+ Linux servers increasing compliance from 65% to 98%.
- Executed automated DR reducing RTO from 4 hours to 15 minutes.

Crest IT Consulting

Application Support Engineer & DevOps Specialist

Mumbai, India

Oct 2022 – Oct 2024

- Maintained CRM/HRMS platforms for 10,000+ users ensuring 99.9% uptime.
- Automated CI/CD pipelines reducing release cycles from 3 days to 4 hours.
- Built monitoring dashboards improving proactive detection by 80%.
- Led incident response reducing MTTR to 45 minutes.
- Ensured PCI-DSS and ISO27001 compliance with zero critical findings.

Gohotspot Multiservices

Network Engineer

Saoner, India

Dec 2017 – May 2020

- Designed secure networks for 15+ enterprise clients achieving 99.9% uptime.
- Implemented QoS improving transaction latency by 40%.
- Built Nagios/Cacti monitoring reducing troubleshooting time by 65%.

Globify Softech

PHP Developer

Nagpur, India

Oct 2016 – Nov 2017

- Built PHP/Laravel applications using CI and containers.
- Conducted security testing reducing incidents by 85%.
- Automated deployments reducing release time from 1 hour to 15 minutes.

Projects

Enterprise Kubernetes Platform

EKS, Terraform, Helm, GitOps

- Designed multi-region platform for 100+ microservices with canary/blue-green deployments.
- Implemented policies blocking 200+ insecure deployments.
- Reduced infrastructure cost by 35% using Karpenter and autoscaling.

Compliance Automation Framework

Ansible, ELK, AWS

- Automated CIS/PCI checks for 500+ servers reducing manual effort by 80%.
- Added CI/CD compliance gates blocking insecure deployments.

IaC Deployment Platform

Terraform, Jenkins, Checkov

- Built self-service provisioning system using Terraform modules and remote state.
- Integrated Checkov blocking 200+ insecure infra changes monthly.

Certifications

AWS Certified DevOps Engineer – Professional (2025)

COWA – Offensive Windows API (2025)

Kali for Penetration Testers — EC-Council (2023)

Hands-on IoT Pentesting — EC-Council (2022)

Linux Crash Course — EC-Council (2022)

CCNA

Education

Bachelor of Computer Applications — Rabindranath Tagore University (2018)

Computer Science — Saraswat Jr College of Commerce & Science

High School — Morning Star Convent (2012)

Professional Development

- Founder of internal "Cloud Guild" conducting DevSecOps workshops for 50+ engineers.
- Developed onboarding curriculum reducing ramp-up time by 65%.
- Contributor to Terraform providers and Kubernetes operators.
