PROFESSIONAL SUMMARY

Senior DevOps and Cloud Engineer with 9+ years of experience building, automating, and securing cloud infrastructure on AWS and Kubernetes. Expert in CI/CD pipelines, container orchestration, infrastructure automation, and site reliability engineering. Proven success in achieving 99.95% uptime, reducing deployment time by 80%, and implementing enterprise security practices. Strong background in compliance frameworks, multi-region architectures, and cloud cost optimization. Looking to leverage skills in a senior DevOps or SRE role.

CORE COMPETENCIES

- **Cloud Platform:** AWS (EC2, S3, RDS, Lambda, IAM, VPC, CloudWatch, EKS, Route 53, ELB)
- **Container Orchestration:** Kubernetes, Docker, EKS, Helm, Karpenter, Service Mesh (Istio, Linkerd)
- **Infrastructure as Code:** Terraform, Ansible, CloudFormation, AWS CDK
- **CI/CD Tools:** Jenkins, GitHub Actions, ArgoCD, GitLab CI, FluxCD
- **Monitoring:** Prometheus, Grafana, ELK Stack, CloudWatch, Datadog, AlertManager
- **Security:** Prisma Cloud, Trivy, OPA, IAM, Security Groups, WAF
- **Programming:** Python, Bash, YAML, JSON, Groovy
- **SRE Practices:** SLIs, SLOs, Error Budgets, Incident Response, Post-Mortems

TECHNICAL SKILLS

- **AWS Services:** EC2, S3, RDS, Lambda, IAM, VPC, CloudWatch, EKS, ECS, Route 53, ELB, ALB, NLB, CloudFront, SNS, SQS, KMS, Secrets Manager, Systems Manager, CloudTrail, Config
- **Containers:** Kubernetes, Docker, EKS, Helm, Karpenter, KEDA, Istio, Linkerd, AWS App Mesh
- **IaC Tools:** Terraform, Terraform Cloud, Ansible, CloudFormation, AWS CDK, Pulumi
- **CI/CD:** Jenkins, GitHub Actions, GitLab CI, ArgoCD, FluxCD, AWS CodePipeline, CodeBuild, CodeDeploy
- **Monitoring:** Prometheus, Grafana, ELK Stack, Datadog, CloudWatch, AlertManager, PagerDuty, Jaeger
- **Security:** Prisma Cloud, Trivy, Checkov, OPA, Gatekeeper, AWS IAM, Security Groups, WAF, AWS Config, Security Hub
- **Scripting:** Python, Bash, YAML, JSON, Groovy, PowerShell
- **Networking:** VPC, Subnets, Security Groups, NACLs, Load Balancing, DNS, VPN, NAT Gateway, Direct Connect
- **Databases:** MySQL, PostgreSQL, RDS, Aurora, DynamoDB, ElastiCache, Redis
- **Compliance:** PCI-DSS, ISO 27001, SOC 2, HIPAA, GDPR

WORK EXPERIENCE

AXIS BANK

- Mumbai, India

Senior DevOps Engineer — Oct 2024 – Present

- Manage AWS EKS Kubernetes clusters hosting 50+ microservices with 99.95% uptime across production workloads
- Build and maintain CI/CD pipelines using Jenkins and ArgoCD enabling multiple daily deployments
- Implement infrastructure as code using Terraform for AWS resource provisioning
- Configure Prisma Cloud for container security scanning and vulnerability management
- Set up Prometheus and Grafana for application monitoring, alerting, and SLO tracking
- Automate Linux patch management for 500+ servers using Ansible playbooks
- Configure disaster recovery solution with automated backups and restore procedures
- Define SLIs and SLOs for production services with error budgets
- Implement cost monitoring using CloudWatch and optimize AWS spend
- Collaborate with security team for PCI-DSS compliance requirements
- Mentor junior engineers on DevOps best practices

- Conduct post-mortems and improve incident response processes
- Implemented banking retail lending platform on EKS with high availability
- Deployed e-sign utility service with DocuSign integration for digital signatures
- Implemented certificate rotation using AWS Secrets Manager and ACM PCA
- Configured TLS/SSL for secure banking communications
- Set up API Gateway with OAuth and mutual TLS for authentication
- Implemented banking microservices with JWT validation
- Deployed fraud detection service with real-time analytics
- Set up payment gateway integration with AWS Direct Connect
- Configured VPC peering for secure banking network
- Implemented database replication for RDS read replicas
- Set up Redis caching with ElastiCache for performance
- Configured KEDA for event-driven auto-scaling
- Implemented chaos engineering for resilience testing

CREST IT CONSULTING

- Mumbai, India

Application Support Engineer and DevOps Specialist — Oct 2022 – Oct 2024

- Manage production CRM and HRMS platforms serving 10,000+ enterprise users with 99.9% uptime
- Build Jenkins CI/CD pipelines for automated application deployments
- Implement ELK Stack for centralized logging and log analysis
- Lead incident response for production issues reducing MTTR
- Ensure PCI-DSS and ISO 27001 compliance for client applications
- Create automation scripts using Bash and Python for operational tasks
- Develop runbooks and documentation for support team processes
- Implement CloudFormation templates for infrastructure as code
- Configure monitoring alerts and notifications
- Train junior team members on DevOps practices

SELF-EMPLOYED (FREELANCE)

- Mumbai, India

Freelance DevOps and Security Consultant — May 2020 – Oct 2022

- Provide cloud infrastructure and DevOps consulting services for SMB clients
- Build CI/CD pipelines using Jenkins and GitHub Actions
- Conduct vulnerability assessments and penetration testing for web applications
- Set up AWS infrastructure using Terraform and CloudFormation
- Perform network security hardening and firewall configuration
- Manage Linux production servers for multiple clients
- Implement security best practices and provide recommendations
- Automate deployment and configuration processes

GOHOTSPOT MULTISERVICES

- Nagpur, India

Network Engineer — Dec 2017 – May 2020

- Design and maintain network infrastructure for enterprise clients
- Configure routers, switches, firewalls, and wireless access points
- Deploy Nagios and Cacti monitoring solutions
- Provide technical support for 15+ business clients
- Implement QoS policies for network performance optimization
- Troubleshoot network connectivity and performance issues
- Design LAN/WAN networks for client offices

GLOBIFY SOFTECH

- Nagpur, India

PHP Developer — Oct 2016 – Nov 2017

- Develop PHP/Laravel web applications following MVC architecture
- Create responsive interfaces using HTML, CSS, JavaScript, jQuery
- Build RESTful APIs for mobile application integration
- Manage MySQL databases with optimization

- Deploy applications on AWS and DigitalOcean cloud platforms
- Perform basic security testing and vulnerability assessment
- Integrate payment gateways and third-party APIs

KEY ACHIEVEMENTS

- Achieved 99.95% uptime for production Kubernetes clusters
- Reduced deployment time from hours to minutes through CI/CD automation
- Implemented security scanning reducing critical vulnerabilities by 75%
- Saved 500+ hours annually through automation scripts
- Maintained 100% PCI-DSS compliance in external audits
- Reduced infrastructure costs by 30% through optimization
- Improved incident response time by 40% with monitoring

KEY PROJECTS

Banking Retail Lending Platform on EKS

- Deploy retail lending platform on EKS with multi-AZ high availability
- Configure PostgreSQL RDS with read replicas for performance
- Implement Redis caching for loan application data
- Set up API Gateway with REST APIs for lending services
- Configure OAuth 2.0 for customer authentication
- Implement rate limiting for API protection
- Set up automated scaling based on loan application volume
- Configure logging and monitoring for compliance

E-Sign Utility Service

- Deploy e-signature service with DocuSign integration
- Implement webhook handling for signature status
- Configure secure document storage in S3 with encryption
- Set up Lambda for document processing
- Implement audit logging for compliance
- Configure certificate management with ACM
- Set up automated certificate rotation
- Implement document retention policies

Certificate Rotation System

- Implement automated TLS certificate rotation using AWS ACM PCA
- Configure Secrets Manager for certificate storage
- Set up Lambda functions for rotation triggers
- Implement certificate renewal notifications
- Configure certificate validation workflows
- Set up alerts for expiring certificates
- Implement certificate inventory tracking
- Configure mutual TLS for API authentication

Enterprise Kubernetes Platform on AWS EKS

- Design and manage EKS cluster for 100+ microservices with multi-AZ deployment
- Implement Karpenter for pod auto-scaling based on workload
- Configure Istio service mesh for traffic management and mTLS
- Set up ArgoCD for GitOps-based continuous deployment
- Create Prometheus and Grafana monitoring dashboards
- Implement Ingress controller with AWS ALB for external access
- Configure Horizontal Pod Autoscaler (HPA) for scaling
- Set up Network Policies for pod security

Compliance Automation Framework

- Build Ansible playbooks for CIS Linux benchmarking
- Integrate Trivy vulnerability scanning in CI/CD pipelines
- Create Grafana dashboards for compliance status visualization
- Automate evidence collection for audits
- Implement OPA policies for security enforcement
- Configure AWS Config rules for compliance
- Set up automated alerting for policy violations

Infrastructure as Code Platform

- Create Terraform modules for reusable AWS infrastructure
- Implement Ansible playbooks for server configuration
- Set up CloudWatch monitoring and custom metrics
- Create reusable infrastructure templates
- Implement state management with remote backends
- Set up policy validation in CI/CD
- Configure drift detection for resources

Observability Stack

- Deploy Prometheus for metrics collection
- Create Grafana dashboards for different services
- Configure ELK Stack for log aggregation
- Set up alerting rules with AlertManager
- Integrate PagerDuty for incident management
- Configure distributed tracing with Jaeger
- Implement custom metrics for business metrics

EDUCATION

- Bachelor of Computer Applications - Rabindranath Tagore University - 2018
- Computer Science - Saraswat Junior College
- High School - Morning Star Convent - 2012

CERTIFICATIONS

- AWS Certified DevOps Engineer Professional - Amazon Web Services - Oct 2025
- AWS Certified Solutions Architect Professional - Amazon Web Services - Jan 2026 (Expires Jan 2029, ID: 3866dfe146504a33b3b884ea30ef051b)
- Certified Offensive Windows API (COWA) - CourseStack, Inc - Oct 2025 (ID: 9ce0826c5a099cd9)
- Kali Linux Penetration Tester - EC-Council - 2023
- Hands-on IoT Pentesting - EC-Council - 2022
- Linux Crash Course - EC-Council - 2022
- CCNA - Cisco - 2022

PROFESSIONAL DEVELOPMENT

- Conduct internal DevSecOps workshops for engineering team
- Create onboarding documentation and training materials
- Active contributor to open-source DevOps projects
- Member of DevOps and cloud communities
- Regular participant in security capture the flag competitions
- Speaker at local technology meetups
