

MONESH RAM

SENIOR DEVOPS ENGINEER | CLOUD & PLATFORM ENGINEERING SPECIALIST

+91 7350856983 moneshram7@gmail.com WhoisMonesh whoismonesh Mumbai, India

To leverage expertise in cloud-native infrastructure, DevOps automation, platform engineering, Kubernetes orchestration, and operational excellence to deliver scalable, secure, and highly resilient technology environments while driving continuous improvement, infrastructure modernization, and business-critical transformations.

Core Competencies

- Cloud & Platform Engineering
- Kubernetes & Container Orchestration
- DevOps & CI/CD Automation
- Infrastructure as Code (IaC)
- Cloud-Native Architecture
- Monitoring, Observability & SRE
- DevSecOps & Security Compliance
- Incident & Release Management
- Infrastructure Modernization & Automation

Technical Skills

Cloud: AWS (EC2, EKS, S3, RDS, Lambda, IAM, VPC, CloudWatch, Route 53, ELB), AWS Bedrock, DigitalOcean

Containers & Orchestration: Kubernetes, Docker, Helm, Karpenter, NGINX Ingress

Infrastructure as Code: Terraform, Ansible, CloudFormation

CI/CD & SCM: Jenkins, ArgoCD, GitHub Actions, GitLab CI, GitHub, GitLab, Bitbucket, Gitea

Monitoring & Observability: Prometheus, Grafana, ELK Stack, Kibana, Datadog, Nagios, Cacti

Programming & Scripting: Python, Bash, Shell Scripting, PHP, Laravel, YAML, JSON

Security: IAM, Security Groups, Data Masking, Trivy, RBAC, Vulnerability Management, Penetration Testing

Databases: PostgreSQL, MySQL

Web & Networking: NGINX, Routing, Switching, Firewalls, Wireless Networks

Profile Summary

- DevOps and Cloud Engineering professional with **nearly 8 years of experience** across DevOps, Cloud Infrastructure, Platform Engineering, Application Support, Network Engineering, and Software Development.
- Currently working as **Senior DevOps Engineer at Axis Bank**, managing AWS cloud environments, Kubernetes platforms, CI/CD ecosystems, observability solutions, and enterprise-scale production workloads.
- Extensive expertise in **AWS, Kubernetes, Terraform, Ansible, Jenkins, ArgoCD, container platforms, infrastructure automation, security integration, and incident management**.
- Proven success in reducing deployment turnaround by **50-60%**, automating infrastructure operations, strengthening data security through PII/SPII masking, and improving operational efficiency through AI-led observability initiatives.
- Recognized for **proactive problem-solving, stakeholder collaboration, ownership mindset, operational leadership, and continuous improvement**.

Career Timeline

Work Experience

Oct'24 – Present | Senior DevOps Engineer | Axis Bank, Mumbai

Key Result Areas

- Managing **500+ Microservices** across **4-5 AWS EKS clusters** spanning Dev, UAT, and Production environments.
- Driving CI/CD automation through **Jenkins, ArgoCD, Terraform, and Ansible**.
- Administering Kubernetes platforms, NGINX web layers, cloud infrastructure, & release operations.
- Leading observability, incident management, platform reliability, & security compliance initiatives.
- Implementing data protection controls, including **PII/SPII masking and encryption** across applications and APIs.

Key Achievements

- Reduced deployment turnaround time by **50-60%** through CI/CD pipeline optimization and release automation.
- Secured sensitive customer information by implementing **PII/SPII masking & encryption** controls.
- Automated infrastructure provisioning, deployments, VPC creation, and security configurations, saving **2+ hours** of manual effort.
- Accelerated root-cause analysis through AI-assisted troubleshooting, log analytics, tracing, and observability platforms.
- Standardized multi-environment infrastructure using **Terraform and Ansible**, improving operational consistency.
- Enhanced platform reliability through proactive monitoring with **Prometheus and Grafana**.
- Earned a **Performance Recognition Award** for outstanding contributions to DevOps and platform engineering initiatives.

Education

- 2018
- BCA
- Rabindranath Tagore
- University, Madhya Pradesh

Certifications

- AWS Certified Solutions Architect Professional, Amazon Web Services (Jan'26)
- AWS Certified DevOps Engineer Professional, Amazon Web Services (Oct'25)
- Certified Offensive Windows API (COWA), CourseStack Inc. (Oct'25)
- Kali Linux Penetration Tester, EC-Council (2023)
- Hands-on IoT Pentesting, EC-Council (2022)
- Linux Crash Course, EC-Council (2022)
- CCNA, Cisco (2022)

Oct'22 – Oct'24 | Application Support Engineer & DevOps Specialist | Crest IT Consulting, Mumbai

- Supported **CRM and HRMS platforms serving 10,000+ users**, ensuring high availability and production stability.
- Automated releases through Jenkins CI/CD pipelines, reducing deployment effort & release risks.
- Implemented centralized **ELK logging**, accelerating troubleshooting and root-cause analysis.
- Reduced MTTR by leading critical incident response and service restoration activities.
- Eliminated repetitive operational tasks through **Python and Bash automation**.
- Improved infrastructure consistency using **CloudFormation-based IaC**.
- Created runbooks and knowledge documentation, strengthening operational readiness.

Dec'17 – May'20 | Network Engineer | Gohotspot Multiservices, Nagpur

- Managed enterprise network infrastructure, ensuring secure and reliable connectivity.
- Configured routers, switches, firewalls, and wireless networks across client environments.
- Enhanced infrastructure visibility using **Nagios** and **Cacti** monitoring solutions.
- Resolved network and performance issues for **15+ business clients**.

Oct'16 – Nov'17 | PHP Developer | Globify Softech, Nagpur

- Developed scalable **PHP/Laravel** applications using MVC architecture.
- Optimized MySQL schemas and queries to improve application performance.
- Deployed and administered applications on **AWS** and **DigitalOcean** platforms.
- Integrated third-party APIs and payment gateways to extend application capabilities.

Projects

DevOps AI Copilot

Tech Stack: Python | Kubernetes | Jenkins | Prometheus

- Built an AI-powered platform for querying DevOps infrastructure using natural language.
- Integrated insights across **Kubernetes, Jenkins, Kibana, Prometheus, & Artifactory** environments.

PRism-AI | Open-Source AI PR Review Agent

Tech Stack: Python | Ollama | AWS Bedrock | GitHub | GitLab

- Developed a self-hosted AI pull-request review solution supporting multiple SCM platforms.
- Integrated LLM-powered reviews with **RBAC-based security and governance controls**.

Docker Vulnerability Hardening Pipeline

Tech Stack: Python | Trivy | GitHub Actions | Docker

- Automated container vulnerability scanning within CI/CD pipelines.
- Implemented Docker hardening automation to remediate security vulnerabilities.

Kubernetes Ingress Migration Suite

Tech Stack: Shell | Kubernetes | NGINX Ingress

- Developed automated tooling for Kubernetes Ingress migration and modernization.
- Simplified controller transitions through automated resource conversion workflow.

Personal Details

Date of Birth : 7th January 1994
Languages Known : English and Hindi
